### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The limitations of claim 1 which require a controller that I) completes the heat-accumulating circuit by connecting the heat accumulating passage to the cooling circuit to supply the cooling medium in the heat-accumulating container to the body of the engine and opens the control valve to increase a flow rate of cooling medium flowing through the bypass passage, and then ii) disconnects the heat-accumulating passage from the cooling circuit and that closes the control valve, is not suggested by the prior art.

The limitations of claim 17, which require completing the heat-accumulating circuit for connecting the heat-accumulating container to the body of the engine and opening the control valve to increase a flow rate of cooling medium flowing through the bypass passage and disconnecting the heat-accumulating passage from the cooling circuit and closing the control valve after opening the control valve, is not suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Benton whose telephone number is (571) 272-4838. The examiner can normally be reached on flex.
